

Why CoinStructive?

Not all jurisdictions have the tools or expertise to track stolen crypto. Law enforcement's knowledge and experiential gap can often lead to stalled or slowed investigations. CoinStructive bridges the gap by tracking where your stolen crypto went and preparing documentation to prove it.

CoinStructive's Blockchain Forensics Reports can be used as evidence by law enforcement to solve a case faster, or by tax professionals to prove your loss.

Additionally, the crypto space is flush with scam asset recovery and investigation companies who falsely promise victims recovery, only to take their money a second time.

It can be difficult to differentiate legitimate firms from the scammers, which is why many companies and organizations build strong relationships with CoinStructive, Inc.

YOUR PATH TOWARDS RECOVERY

WE OFFER

- Free 15 minute consultation to help you understand your options
- Dedicated case manager and a forensic analysis of your transactions
- Contacts with local & federal law enforcement ensuring your case is seen

THE COINSTRUCTIVE PROCESS

STEP 1 - INTAKE

After opening a case from our website, a case manager will contact you for your free consultation and discuss the details of your loss.

STEP 2 - BLOCKCHAIN FORENSICS

If you decide to move forward, our investigations team will analyze, track, trace, and document where your crypto went. Our analysis will determine what is potentially recoverable. Our findings will be made available to you and we can recommend whether or not a Blockchain Forensics Report should be pursued.

STEP 3 - BLOCKCHAIN FORENSICS REPORT

With a Blockchain Forensics Report in hand, you have everything you need to bring to law enforcement. A Forensic Report is a thorough and detailed account of where your crypto went, who received it, and where they landed so that they can be subpoenaed for recovery.
